CONNECTING TO GUEST WI-FI

Android device shown, but laptops and Apple devices similar.

1 Open and look for WiFi Guest. Select it and either wait for a message to log in or go to your device's web browser.

2 If a message shows on your status bar, tap it.

3 In your device's web browser, you need to get to this screen. If this has not happened try browsing to www.kent.ac.uk

In the middle section in blue, click or tap on the 'continue' button.

4 At the login screen, either enter your login (if you have used the Guest WiFi before or if you are a Sky customer), otherwise click or tap on Create Account.

5 Enter your details in the form as required, and set yourself a username and password. Once done you will be returned to the login screen. A red asterix denotes a required field.

6 Login with the combination you just created, and you will now be connected to WiFi
